Kianush Dixon

Web Developer | Consultant | Technical Support

Frontend developer, consultant, and technical support professional with over 15 years of experience in researching, developing, troubleshooting, and testing software using various development platforms. Highly experienced and skilled in communicating with clients and offering cost-effective software solutions.

Experience

WEB DEVELOPER
February 2020 - Current
Tivity Health, Franklin, TN

- Create and maintain corporate webpages using customized WordPress, PHP, HTML5, CSS3, and Adobe Creative Suite.
- Worked as part of a team with migrating and configuring Microsoft IIS servers.
- Rebuilt, redesigned and rebranded Tivity Health's intranet to improve user experience, both frontend and backend.
- Design and implement Tivity's online annual corporate social responsibility report and annual compliance training with the objective of improving user experience.

WEB DEVELOPER / TECHNICAL SUPPORT
September 2012 - July 2019
Franklin Road Academy (FRA), Nashville, TN

- Maintained FRA's website using HTML5, CSS, ColdFusion, JavaScript, and SQL.
- Researched, implemented and trained various software and hardware technology for students, faculty and staff.
- Designed custom HTML medical reports for the school nurse. Expedited the process of caring for students in her office and allowed offsite access to medical information for purposes such as field trips.
- Created online student policy system to improved efficiency and accuracy by eliminating traditional paper forms.
- Developed a back-to-school process webpage to support the entire school community.
- Performed market research and launched implementation of an online school event ticket reservation system. Simplified process of ticket buying: ticket sales increased and attendees reported a more enjoyable experience.
- Created vector graphics for web and print. Photographed events/individuals using raw digital photography.
- Coached and managed the middle school cross country team.

PROGRAMMER / ANALYST
June 2000 - March 2003
Deloitte & Touche LLP, Hermitage, TN

- Designed, programmed, and implemented an interface using PowerBuilder 5.0 with database Oracle 8.0 to produce custom client revenue reports.
- Investigated data discrepancies, troubleshooted time and expense software, and provided technical assistance.
- Worked extensively with Microsoft SQL Server, Oracle SQL Plus, and Oracle PL/SQL to create stored procedures and automated reports.
  (*I resigned in March of 2003 to stay home and raise my two children.*)

PROGRAMMER / POWERBUILDER CONTRACTOR
February 1999 - June 2000
Programming Resources, Inc., Nashville, TN

- Developed and maintained software coded in PowerBuilder 6.0 with Oracle 7.0 database.

SENIOR PROGRAMMER / ANALYST
March 1994 – January 1999
System Automation Corporation, Silver Spring, MD

- Designed, developed, and coded a personnel management information system for the United States Army using PowerBuilder 5.0 with Oracle 7.0 database.
- Performed task analysis, software maintenance, and technical support.
